The Simple Way to Add Dependable Printing

Whether you’re new to bar coding, upgrading from a desktop printer, or adding new printers, Zebra’s S4M thermal printer delivers an affordable solution for many labeling requirements.

Designed for the budget-minded, this printer offers you ease of use, the durability of a metal frame/case, and a full 8’ media roll capacity that means fewer label changes. The S4M is an outstanding value compared to similar printers on the market.

Simple to Use

The S4M printer’s front control panel features a streamlined menu for simple navigation, while its proven side-loading design eliminates threading of labels and ribbons for quick, easy loading. The result: your operators have more time to focus on more productive tasks.

Simple to Integrate

The S4M printer offers a variety of ways to connect—from serial, parallel, and USB interfaces to internal 10/100 Ethernet or wireless 802.11b—for simple system integration. And it will fit right in with your other Zebra printers because it speaks the same programming languages (ZPL® and EPL™). Plus, Zebra’s APL™ language lets you easily change from other-brand printers to S4M printers without changing your label formats.
